Breaking all the rules!!!

What is Vacuum Plumbing?

AcornVac Vacuum Plumbing and Drainage Systems provide a viable, cost-saving, environment-friendly alternative to gravity drainage of condensate, gray water, sanitary and grease waste.

Advantages of Vacuum Plumbing

- Reduced Water Costs
- Reduced Construction Costs
- Design Flexibility
- Reduced Maintenance

Project Types that could benefit from Vacuum Plumbing?

- Any Remodel Project
- Hospitals
- Supermarkets
- Correctional Facilities
- Prisons & Jails
- Department Stores
- Restaurants
- Commercial buildings

Did you miss the mobile showroom when we had it in Montana? AcornVac mobile showrooms are self contained and fully operational, featuring transparent waste piping so that visitors have an opportunity to view the high performance working dynamics of AcornVac Vacuum Plumbing Systems. Visitors are provided a basic overview of vacuum plumbing systems and have an opportunity to test the power of a 1/2 gallon vacuum flush toilet and to see how standard plumbing equipment can be easily tied into the vacuum drainage system, without requirement to cut floors or trench to tie into below grade waste piping.

Q: What Montana project utilized the AcornVac plumbing system and was highlighted in AcornVac’s Case Studies?

Prize: $50.00 AMEX gift card

CONGRATS to Steve Gourley of Dumais*Romans, Inc. Consulting Mechanical Engineers correctly answered our June Q/A. Phoenix Controls developed a unique approach to maintaining directional airflow which is titled, Volumetric Offset.
